

SHOBIT SHARMA

Full Stack Developer | Python & Django Engineer | React & React Native

shobhitsharma120@gmail.com | +91-7017801795 | Ghaziabad, Uttar Pradesh

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 5+ years of experience designing and delivering scalable web and mobile applications. Proficient in Python, Django, Fast API, ReactJS, and React Native. Hands-on expertise in REST API development, cloud deployment on AWS (ECS, ECR), payment gateway integrations (Stripe), and data analytics. Adept at building end-to-end solutions from backend architecture to responsive frontends. Previously worked as a Data Analyst (1.5 years) with strong skills in Google Analytics, AdWords, and Data Studio.

TECHNICAL SKILLS

Languages	Python, JavaScript, HTML, CSS
Frameworks	Django, FastAPI, Flask, ReactJS, React Native (Expo)
Databases	MongoDB, MySQL, SQL
Cloud & DevOps	AWS ECS, AWS ECR, Docker (Containerization)
APIs & Payments	Django REST Framework, REST APIs, Stripe
Data & Analytics	Pandas, NumPy, OpenCV, Google Analytics, AdWords, Data Studio
Tools	Advanced Excel (VLOOKUP, HLOOKUP, Pivot Tables), CRM Tools, Selenium
ML & AI	Machine Learning (scikit-learn), OpenCV

PROFESSIONAL EXPERIENCE

State IT Head / Technical Trainer | Webtoks AI

Amritsar, Punjab · Oct 2025 – Mar 2026

- Delivered technical training on HTML, CSS, JavaScript, ReactJS, React Native, Python, and Django to students and junior developers.
- Led in-house project development and managed IT operations for the state-level team.
- Designed and reviewed full-stack project architectures for internal products.

Python / Full Stack Developer | Freelance (Blue Digital & Others)

Remote · Nov 2024 – Aug 2025

- Built SNAPIT from scratch — a full-stack application with user authentication (signup/login), image uploads, and employee data management using Python, Django REST Framework, React, and MySQL.
- Developed Python automation scripts using Pandas, NumPy, CSV, and Selenium for data extraction and process automation.
- Delivered client-specific backend APIs and integrated third-party services per project requirements.

Backend Engineer | BeFiSc

New Delhi (Remote) · July 2024 – Sep 2024

- Wrote Python scripts for automated data collection and processing using Pandas and DataFrames with chunked CSV output for high-volume datasets.
- Fetched and transformed structured records from databases to support the PMFBY and BSB in-house projects.
- Improved data pipeline performance through optimized DataFrame operations.

Software Developer | [A.I.C](#)

New Delhi · Dec 2022 – Dec 2023

- Designed backend data pipelines using Python, Django, MongoDB, SQL, React, Pandas, and DataFrames for government-facing projects (BSB, PMFBY).
- Built structured data collection and cleaning workflows, significantly reducing processing time via optimized chunked CSV exports.
- Collaborated with stakeholders to translate business requirements into maintainable technical solutions.

Software Developer | [CyberMedia Research Pvt. Ltd.](#)

Gurgaon · Dec 2021 – Nov 2022

- Built and maintained CMGalaxy.com, a multi-client digital marketing analytics platform serving clients such as Apeejay School, Idea Clan, and Suburban Jungle.
- Integrated Python APIs to fetch data from Google Analytics, AdWords, Facebook, and DV360; stored results in MongoDB via custom ingestion pipelines.
- Developed responsive frontend dashboards using React and HTML/Bootstrap, integrating Django APIs to serve client-specific data.
- Automated the full reporting lifecycle using cron jobs and Python scripts, enabling scheduled, personalized reports to clients and managers.
- Designed and maintained Google Data Studio dashboards with cross-platform data (Analytics, AdWords, Facebook, DV360) for client reporting.

Full Stack Developer | [Brancosoft](#)

India · July 2020 – Dec 2021

- Developed scalable web and mobile applications using Python, Django, ReactJS, and React Native.
- Integrated Stripe payment gateway and managed SSL, domain, and CRM-related operations.
- Deployed applications using AWS ECS and ECR for containerized cloud environments.
- Collaborated across frontend and backend teams to deliver high-quality, client-focused features on schedule.

EDUCATION

Master of Computer Applications (MCA)

Dewan VS Institute of Management Technology (CCSU) · 2020

Bachelor of Computer Applications (BCA)

BIMTGARH ROAD, CCSU · 2017

KEY PROJECTS

CMGalaxy.com [Python](#) · [Django](#) · [MongoDB](#) · [React](#) · [Google APIs](#)

Multi-client analytics portal aggregating data from Google Analytics, AdWords, Facebook, and DV360 for digital marketing clients.

Automated Reporting System [Python](#) · [React](#) · [MongoDB](#) · [SQL](#) · [Cron Jobs](#)

End-to-end automated report generation system that delivers personalized, scheduled reports to clients and managers without manual intervention.

SNAPIT (Freelance) [Python](#) · [Django](#) · [REST Framework](#) · [React](#) · [MySQL](#)

Full-stack employee data management app with user authentication, image upload, and secure data storage built from scratch.

BSB / PMFBY Data Pipeline [Python](#) · [Django](#) · [Pandas](#) · [MongoDB](#) · [SQL](#)

High-performance data collection and cleaning pipeline for government projects using chunked DataFrames for fast bulk processing.
